

MARKED COPIES OF AMENDED CLAIMS

1. (Once amended) A method for creating an image on a display
2 surface of a substrate, said method comprising:
a) applying a first layer of waterfast medium to a surface of an ink-jet
4 transparency sheet having a coating adapted to receive hydrophilic solvent-
based ink to create an image on said transparency sheet, said first layer of
6 waterfast medium being applied to the coated surface of the ink-jet transparency
sheet;
8 b) at least partially liquifying said image and coating on said ink-jet
transparency sheet with a solvent;
10 c) placing the surface of the ink-jet transparency having the at least
partially liquified image and coating in intimate contact with said display surface
12 of said substrate for a time sufficient to transfer a portion of said image and
coating from said transparency sheet to said substrate; and
14 d) peeling away said transparency sheet.

4. (Once amended) The method of claim 2 further including
2 modifying said image by applying a second layer of waterfast medium to the
coated surface of the ink-jet transparency sheet.

6. (Once amended) The method of claim 1 including applying to
2 the coated surface of the ink-jet transparency sheet a second layer of a medium
different from said first layer of waterfast medium.

8. (Once amended) The method of claim 1 including the further
2 step of modifying said image by adding one or more additional layers of medium
to said coated surface of said transparency sheet prior to said step of partially
4 liquifying.

20. (Once amended) A method for creating an image adapted for
2 transfer to a display surface of a substrate, said method comprising applying a
first layer of waterfast medium to a surface of an ink-jet transparency sheet
4 having a coating adapted to receive hydrophilic solvent-based ink to create an
image on said transparency sheet, said first layer of waterfast medium being
6 applied to the coated surface of the ink-jet transparency sheet.

23.. (Once amended) The method of claim 20 including modifying
2 said image with additional media applied to said display surface.
